Dear Mr. Munson:

We are considering doing some exploratory work in the Thomas Range near our other small mine sites. The work would consist of small blasts in an area approximately 30'X 30'. It is in solid rock on a steep incline so would be unreclaimable. Could we put this work on the same permit with our other sites since all of them combined are well under the 5-acre limit of a small mining operation? If so, we will file a notice with locality information.

Thanks,

Sandra Sprunger
